

GALLATIN CITY HALL

GALLATIN CITY HALL SPACE NEEDS ASSESSMENT

ISSUED: OCTOBER 31, 2024

INTRODUCTION

The City of Gallatin's Industrial Development Board has engaged Studio Eight Design to prepare an updated Space Needs Assessment to help evaluate and plan for the future of Gallatin's City Hall. The City is in discussions with Boyle Investment Company to explore the feasibility of developing a new mixed-use development in downtown Gallatin. The proposed development will consider transforming two city-owned blocks into a dynamic live/work corridor featuring a major hotel brand, residential units, open green spaces, retail and restaurant space and possibly a new City Hall to meet the needs of the community.

The goal of this Space Needs Assessment is twofold:

1. To help determine the range of square footage required if the city decides to build a new City Hall, and
2. To help determine whether it is feasible to renovate the existing City Hall to accommodate current and future space needs. If the existing building is renovated, the space needs assessment will illustrate how long the future needs can be accommodated within the facility.

A preliminary probable opinion of cost will be provided for these two scenarios, based on current regional construction costs for similar facilities. This report will support the City's due diligence effort to determine whether to pursue a public-private partnership with Boyle as part of the proposed mixed-use development.

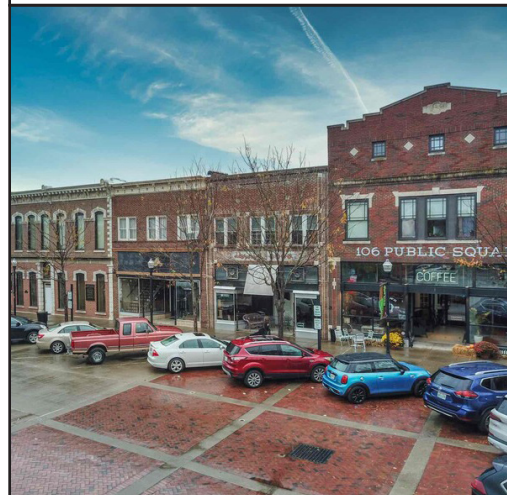

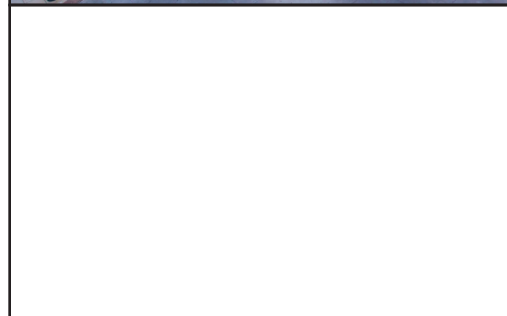

KEY CONCLUSIONS

In a perfect world, the space needs assessment determined a need @ 47,000 gross square feet in twenty years. The above square footage needs does not take into account actual floor plates or possible stacking scenarios for the site chosen.

Based on the required square footage, the building will most likely be a 2-story building. Therefore, the grossing factor of 25% used within the assessment included square footage for vertical circulation elements such as stairs and elevators. If City Hall remains downtown, a two-story building is in keeping with the height, scale, and massing of historic downtown Gallatin.

The existing building consists of two levels above grade with one basement level totaling @ 37,000 square feet. Based on the results of the assessment, the square footage of the existing building does not meet the current and future square footage needs for the departments currently located within City Hall.

If the city decides to proceed with the construction of a new facility, consideration may be given to inclusion of a basement to meet additional storage needs, potentially provide a storm shelter, and provide additional growth and / or storage space for the future. A storm shelter is not currently included in the space needs assessment.

INTRODUCTION

GALLATIN'S PRESENT CITY HALL

The existing City Hall structure was constructed in 1974. The City commissioned a Building Assessment in 2020 which concluded the following:

- The building could operate for an additional 10+ years (up to year 2030). After that time, it will be increasingly difficult to find replacement parts for the mechanical and electrical systems requiring an extensive and costly replacement of the building infrastructure.
- The building is not sprinklered and not in compliance with current building, life safety codes, and accessibility codes.
- The walls of the central corridor are load bearing making modifications to these walls difficult and potentially cost-prohibitive, limiting the ability to extensively renovate the building.
- A security assessment should be conducted to determine if upgrades are required to provide the necessary safety for staff and the visitors to the building.
- The current layout of the interior is compartmentalized with multiple hallways, concrete block walls, and very little access to daylight which is not reflective of healthy work environments of the 21st century. Attracting new talent and retaining current staff may become challenging given the state of the physical work environment within the existing building.
- The current building lacks organizational clarity. A first-time visitor must seek out the department they need if there is not a person at the front desk.
- Toilet rooms and the current elevator do not appear to meet current accessibility codes. The Toilet Rooms and Elevator Shaft are landlocked by surrounding spaces and load-bearing masonry, making expansion more challenging and costly.

*In the responses from Department Directors, there were a few items listed repeatedly by nearly all respondents:

a) More windows for natural light; b) More contiguous, flexible space to keep staff within departments together rather than separated across halls, in different rooms, or in separate areas of the building; c) More & different types of Conference Space; d) A shared, common Staff Break Room Area; and e) Improved security. The existing City Hall structure and layout presents challenges to address these features within the limited space available. The cost of the renovation will involve upgrades & replacement of building structure, infrastructure systems, technology, and current accessibility codes. This will make these renovations and any expansion more expensive than typical office space renovations. Based upon our observations, the feedback from staff, and anticipated costs to remedy base building systems in addition to creating a more efficient, welcoming, secure, and functional City Hall, we believe that the current facility has lived its life and served the City well, but a new facility may be a more prudent, cost-effective long-term solution to address the next 20 years as Gallatin continues to grow.

APPENDIX 60

BACKGROUND

Gallatin, Tennessee was established on the Cumberland River and made the county seat of Sumner County in 1802. It is located approximately 30.6 miles northeast of the state capital of Nashville. The General Assembly of the State of Tennessee by an act passed Nov. 6, 1801 appointed Samuel Wilson, Charles Donoho, and Thomas Murray, commissioners to purchase 40 acres of land and lay out a town for the seat of justice. On February 25, 1802 the commissioners purchased the original site of the town of Gallatin from James Trousdale for \$490, containing 42 and a half acres including an acre reserved by Captain Trousdale and one and a half acres in the public square.

The city was named for Albert Gallatin, United States Secretary of the Treasury to Presidents Thomas Jefferson and James Madison. In 1803, the first county courthouse and jail were built on the central town square. Andrew Jackson became one of the first to purchase a lot when the town was surveyed and platted in 1803. The same year, Andrew Jackson built a home and the first general store in Gallatin. Andrew Jackson practiced law on the historic town square and in the Douglass Clark House, which served as the first Courthouse in Sumner County.

In 1809, the original site of the city was increased by purchasing 29 acres of land adjoining it to the east. Gallatin continued to be governed by the commissioners until it was incorporated on Nov. 7, 1815. The early growth of the city was slow and steady. In 1830, according to the Tennessee Gazetteer, the city contained, “a good courthouse, jail and public offices, a large brick church used by all denominations, a Masonic Home, a printing office, 12 stores, two taverns, 11 lawyers, four physicians, one cabinet shop, one chair factory, three tailor shops, two shoemaker shops, two saddle shops, one wagon maker, one tan yard, one tinner and coppersmith, three blacksmith shops, one hatter, one male and two female academies, 666 inhabitants of which 234 were black, 35 log, 38 frame, and 27 brick houses.”

In 1873 the population was devastated by a cholera epidemic, killing one out of every fifteen people. The town was also devastated by multiple fires in the late 1800s. Early downtown buildings were constructed of wood, contributing to the fires. As fire codes were implemented, brick became more prevalent as seen in the historic structures still in place throughout downtown today.

Today, Gallatin is the 5th fastest growing city in Tennessee. Over the past 3 Censuses, Gallatin’s population has demonstrated significant growth:

- 2000 United States Census: Population of 23,230 people.
- 2010 United States Census: Population of 30,278 people.
- 2020 United States Census: Population of 44,431 people.
- As of July 1, 2022 the US Census estimates Gallatin’s population at 48,194 people.
- Gallatin anticipates growing to a population of 56,000 within the next 10 years.

BACKGROUND

Gallatin has a Mayor-Council government. The City Council is made up of seven elected officials: five are elected from single-member districts within the city limits, and two members are at-large. Of these seven council members, one is elected by members of the council as Vice-Mayor to serve a limited term. Meetings are presided over by the Mayor, who is elected at-large by voters of the city. The current Mayor and Council Members are:

- Page Brown, Mayor
- Lynda Love, District 1
- Dr. Aaron Allison, District 2
- Pascal Jouvence, District 3
- Craig Hayes, District 4
- Steven Carter, District 5
- Shawn Fennell, Council at Large

Gallatin was named the #7 Best City to move to in Tennessee by USA Today in 2024. Several national companies have facilities or headquarters in Gallatin, including Facebook (META), Gap, Inc., Beretta and Servpro Industries, Inc. Gallatin was formerly the headquarters of Dot Records, originally founded to highlight local Tennessee artists. The city is also the site of Volunteer State Community College, a two-year college with more than 70 degree programs. In 2017, Gallatin was ranked as “The Nicest Place In America” by Reader’s Digest.

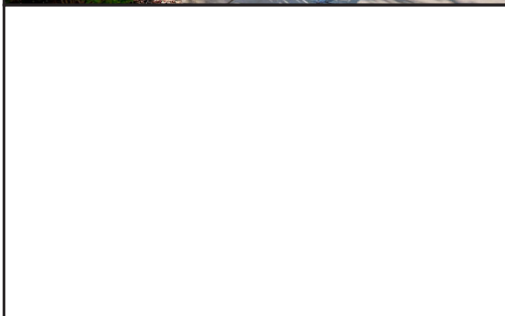

Since it was founded, Historic Downtown Gallatin, Inc., has spearheaded the revitalization of Gallatin’s historic downtown core. The revitalization effort has followed the four-point program of the National Main Street Center of the National Trust for Historic Preservation: Organization, Design, Promotion and Economic Restructuring. Working in partnership with city and county government, property owners, preservationists, local businesses and merchants in the historic retail district, Historic Downtown Gallatin, Inc. has helped create one of the nation’s best Main Streets. Gallatin has earned recognition as an authentic, eclectic place that offers something for everyone in an atmosphere that reminds locals and visitors alike of a simpler time in history – a place where community matters.

Gallatin is growing and a desirable place to live. Downtown is undergoing a thriving revitalization with a mix of community businesses. City Hall has always been a part of the Downtown community, reinforcing the level of service the City offers businesses and residents alike. Keeping City Hall downtown – whether through renovating the existing structure or building a new City Hall as part of the new redevelopment is to be commended. Maintaining a civic presence downtown reinforces the historic district’s heritage and importance as a landmark for all of Gallatin.

Largely because of the pandemic, Gallatin is experiencing a significant growth explosion in population as people from larger urban centers are relocating to Middle Tennessee. This Space Needs Assessment will identify the anticipated growth in City Staff to continue to deliver a high level of service to its residents and businesses as Gallatin continues to grow.

SUMMARY OF DOCUMENT

ASSESSMENT METHODOLOGY

Studio Eight Design began the space needs assessment process with a kickoff meeting with City Leadership to review the organizational charts for each department and to take a tour of the existing facility. Studio Eight Design then developed two questionnaires, one for Leadership and one for each department to be completed by the departmental directors. Studio Eight Design used the information gathered from the initial kick off meeting and the questionnaires feedback to develop the Space Needs Assessment.

The purpose of the space needs assessment is to provide a high-level estimation of City Hall square footage to meet the current and future needs of a growing Gallatin community. The study is intended to equip the City of Gallatin with data for long-term decision making in the evaluation of a variety of development options. The assessment is a benchmark and is in no way intended to reflect the square footage of a final design for the facility. Site constraints can have an impact on the building arrangement and stacking, leading to alterations in the overall building square footage.

ASSESSMENT OVERVIEW

City Halls are planned as long-term facilities that should serve a municipality for many decades into the future, allowing for growth while facilitating efficiency in operations over the lifespan of the building. You will find that we grouped departments according to their adjacency needs. To maximize operational efficiency, departments that interact most should be located spatially adjacent to each other. The zones listed below consist of departments that should be adjacent to each other within the building to maximize efficiency of space and City operations.

- **Administrative Zone:** Mayor and City Administration (Inclusive of Communication offices), Attorney, Human Resources, Finance and Purchasing
- **Public Access Zone:** City Clerk and Economic Development, Communications (Production Studio)
- **Development Services Zone:** Codes, Planning, Engineering
- **Facilities Support Zone:** Information Technology and Facilities

SUMMARY OF DOCUMENT

To assist the city in the evaluation of options, the Assessment includes three different Space Needs scenarios.

Option A: Space Needs based solely on the information gathered from the Departmental Questionnaires

***Note: All workspace assignments, i.e. office vs. workstations, were made according to the department directors' request within the questionnaire. The assessment includes recommendations for shared support spaces within the zones such as work rooms and conference rooms.*

Option B: Relocating Codes, Planning, and Facilities to the Public Works Facility

***Note: Operationally, Codes and Planning would benefit from being co-located with the Engineering department. Currently, the Engineering Department is located offsite in the Public Works Facility. This Option summarizes the reduction in City Hall square footage if Codes and Planning were to move to the same facility as the Engineering Department. This is a cost savings measure to the City Hall project, but the cost to renovate or add on to an existing facility should be considered in the evaluation of this option.*

The projected square footage is based upon developing and adopting space standards. The space standards are modular building blocks that allow for maximum flexibility for future growth. For example, an enclave (small conference room) is sized the same as a private office so spaces can be converted over time by only changing out the furniture and not reconfiguring the walls. Open office environments with workstations provide maximum flexibility over time and allow spaces to adapt to growth with minimal disruptions and expense. The spaces standards used for this assessment are included in the document for reference.

Each departmental net square footage includes a 25% circulation factor. The overall building gross square footage includes a 25% grossing factor for building core items such as restrooms, stairs, elevators, mechanical, and electrical rooms. The 25% grossing factor also includes square footage for exterior and interior wall thickness and structural elements.

OFFICE DESIGN RECOMMENDED BEST PRACTICES

RECOMMENDED BEST PRACTICES

Office trends change over time, but there are many best practices that should be implemented in office design to maximize efficiency of operations and flexibility over time and to promote health and well-being of employees. Some of these best practices are listed below.

- Maximize access to daylight: We recommend placing open office areas along the building perimeter and locating the offices internal to the floor plate with glass fronts facing the exterior wall. This maximizes access to daylight within the workspaces for all building occupants. It also promotes better energy efficiency and lower operational costs by utilizing more daylight throughout all spaces in lieu of dependency on electric lights.
- Maximize flexibility in the initial design to facilitate growth over the lifespan of the building, i.e. limit construction of hard walls and maintain open office environments where possible.
- Implement technology that is user friendly and scalable over time.
- Implement sound masking as a tool to minimize audible disruptions within an open office environment.
- Provide a variety of sizes of shared conference rooms.
- Provide enclaves (small meeting rooms) that are equipped with the technology for Teams/Zoom meetings to limit the number of virtual meetings taken from the work areas.
- Provide phone rooms or phone booths where those in an open office environment can go to make a private phone call.
- Provide shared amenity spaces between departments - coffee/break areas, work areas, and waiting areas to allow for efficiency in operations and promote collaboration amongst departments.
- Provide conveniently located amenities such as wellness rooms, mother's rooms, and fitness center.
- Promote movement through the office with conveniently located stairs, sit-stand desks, and outdoor spaces accessible by employees.

In a well-designed City Hall, the spaces that the visitors most need should be most accessible. A City Hall is divided into three distinct functional areas:

- Formal Public Spaces such as the Council Chambers, multi-purpose rooms and courts.
- Service Areas: Recorder, Codes, Planning, Economic Development
- Administrative and other Office Ares (Staff Zone)

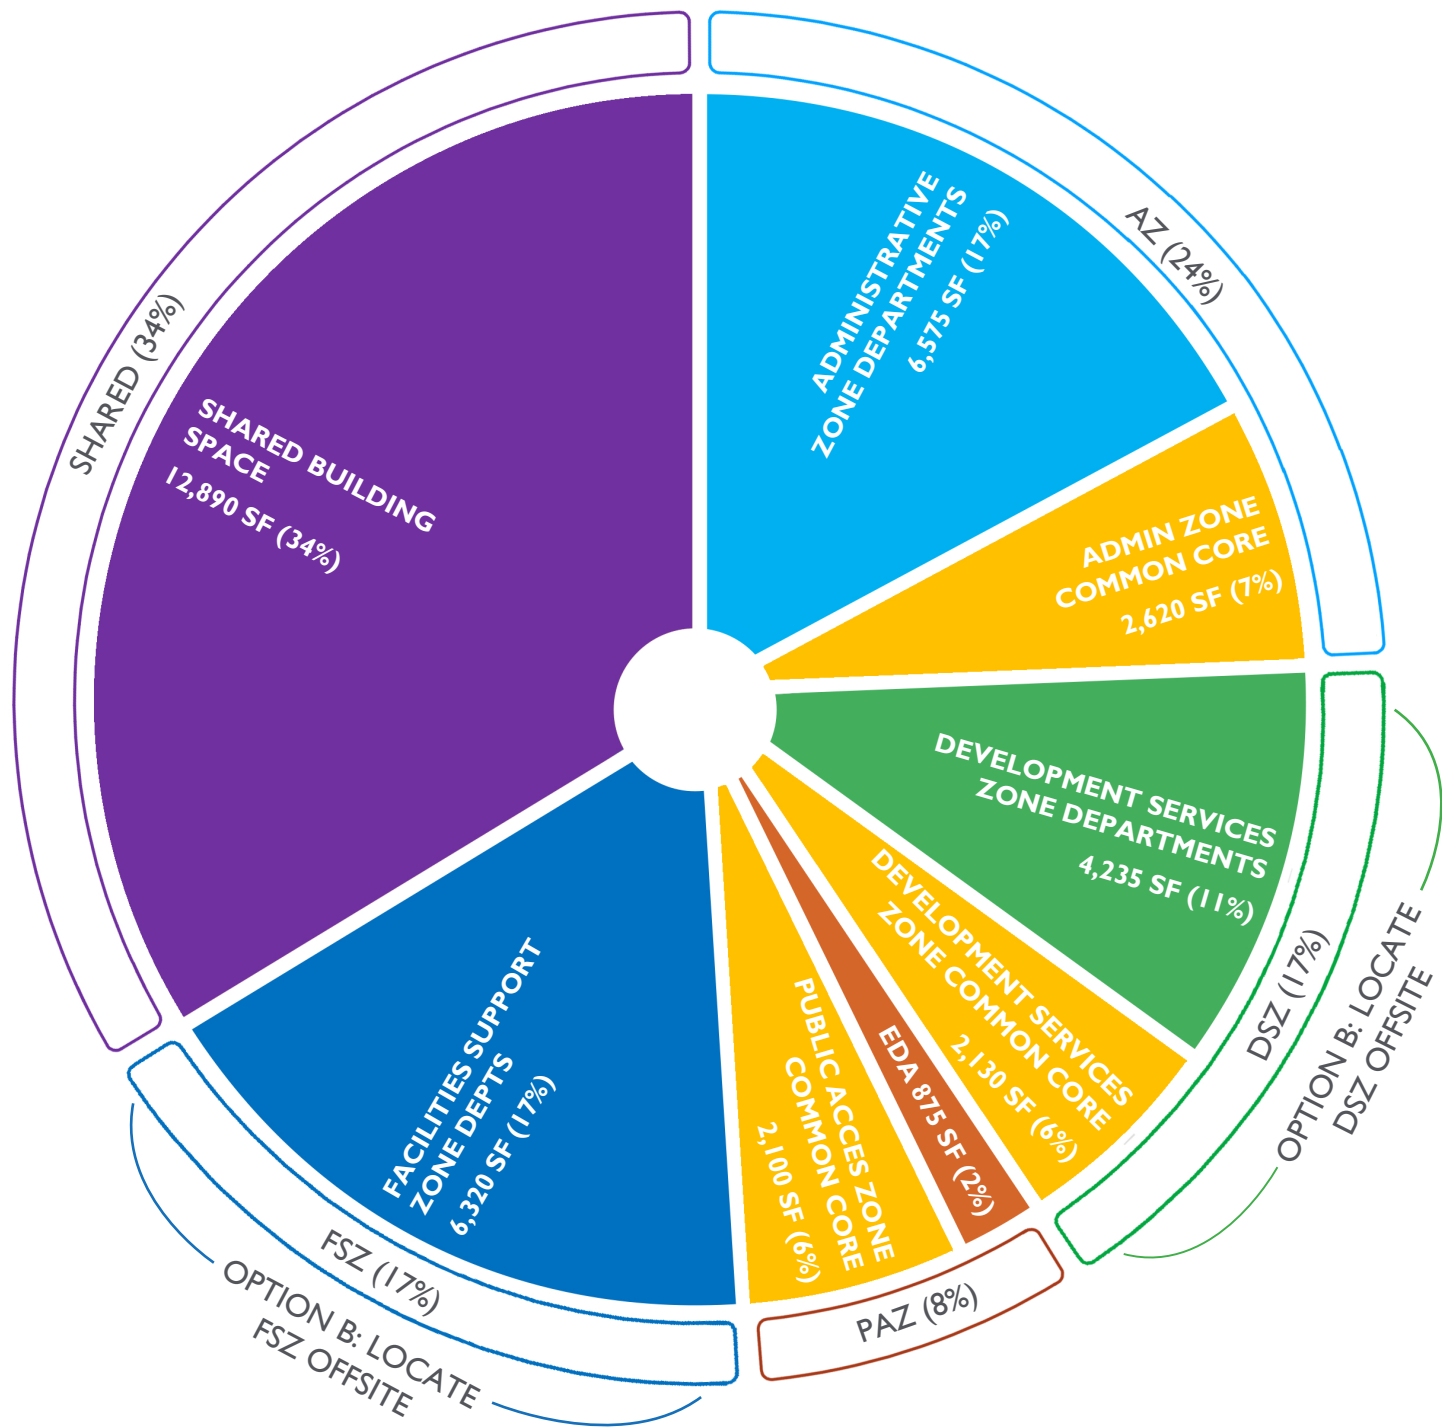

CITY HALL DESIGN RECOMMENDED BEST PRACTICES

Having clear, secure delineation between the public zones and staff zones of the building is critical to the safety of the building occupants. Below are recommended security best practices for City Hall Design:

- Maintain separation between the secure staff zones and public zones of the building. This is typically addressed through access-controlled points between the public zone and staff zones of the building.
- Limit the number of access points into the building
- Provide infrastructure for increased security needs over time (i.e. metal detectors and/or x-ray machines)
- Maintain appropriate level of security at the services counters (The necessary level of security can be determined by a security consultant expert through the evaluation of a recent Crimecast Report)

OPINION OF PROBABLE COST

The costs below are ROM (“Rough Order of Magnitude”) opinions of cost based on cost per square foot of similar projects recently completed by Studio Eight Design. ROM estimates can vary as much as 50%. Therefore, it is recommended that a Pre-Construction cost estimator is brought on board to provide more accurate pricing as the City proceeds with the design process for renovation or construction of a new City Hall.

City Halls are not the same building type as typical office buildings. They are built to be Owner-Occupied for long-term use. The materials and systems factor in cost efficiencies for maintenance, quality, and durability for longer periods than typical office space. As a result, the cost / square foot is often higher and budget expectations should be established accordingly. The City will want to clarify its role as “Owner” vs “Tenant” in weighing its options of controlling the specifications and maintenance of building systems, finishes, and operating costs.

Cost per square foot is for vertical building construction hard costs only. Cost does not include site improvements or soft costs, such as design fees, FFE (furniture, fixtures, equipment), permitting, insurance, etc.

Costs given are based on similar current 2024 project cost rates. We recommended carrying a minimum of 3.5% - 4% annual inflation for years beyond.

We recommend carrying a minimum 5% contingency until more accurate design based pricing can be acquired from a Pre-Construction cost estimator.

RENOVATION OF EXISTING BUILDING

Based on the results of the Space Needs Assessment, it is recommended that Codes and Planning move out of the City Hall facility to the Public Works facility with the Engineering Department if the City decides to proceed with the renovation. Therefore, the 37,000 square feet could accommodate the future growth of City Hall up until 2045.

The cost of an addition or renovation to the Public Works Facility should be taken into account when considering the renovation option which could be as much as the following:

Existing Building:

37,000 SF @ \$475 - \$500 per square foot	\$17,575,000 - \$18,500,000
---	-----------------------------

Addition or Renovation to Public Works:

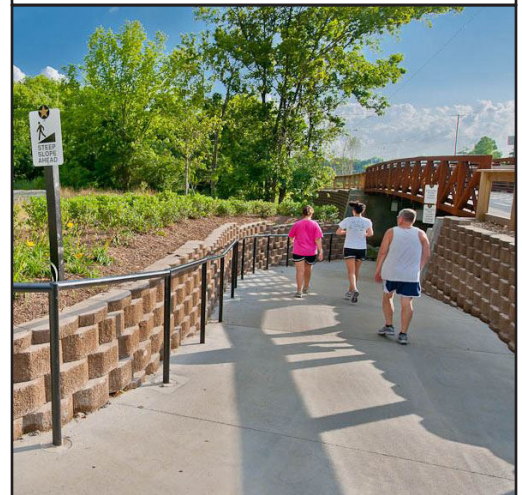

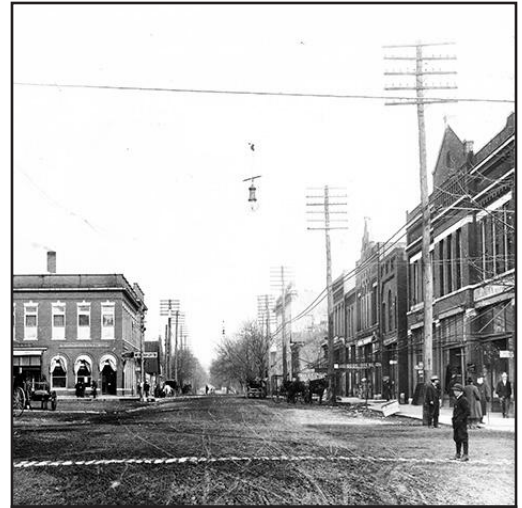

12,000 SF @ \$575 - \$600 per square foot	\$6,900,000 - \$7,200,000
---	---------------------------

CONSTRUCTION OF A NEW CITY HALL (OPTION A)

41,455 SF @ \$575 - \$600 per square foot	\$23,835,475 - \$24,871,800
---	-----------------------------

CONSTRUCTION OF A NEW CITY HALL (OPTION B)

29,455 SF @ \$575 - \$600 per square foot	\$16,935,475 - \$17,671,800
---	-----------------------------

APPENDIX

The Appendix includes the completed Leadership and Departmental Questionnaires. The information gathered in the questionnaires was used to develop the Space Needs Assessment.

July 24, 2024

Name:

Leadership Role:

Gallatin City Hall - Space Needs Assessment

S8D Project No. 2407.00

Leadership Questionnaire

While completing the Questionnaire below, please think about ideal conditions for a new City Hall rather than how the current facility works. This is an opportunity to address issues, fix problems and envision a facility that supports your staff as well as the citizens of Gallatin. What role should City Hall have in the community? How can the building best serve its residents? Should it welcome visitors? How will Gallatin's growth in population and new industries be supported by City Hall? How can a new City Hall help to attract talent as your staff grows? Thinking about these issues will help to evaluate the current facility and allow for new thoughts that support Gallatin's future.

1. What do you view as the major challenge(s) to the City of Gallatin being able to deliver services to the local community?

A. Present day:

Response: Keeping up with growth in terms of personnel, equipment, and infrastructure; bridging the gap between our older citizens who do not like doing business on-line and those who want to do everything remotely.

B. Long range:

Response: Changes in technology that some citizens find difficult to navigate; maintaining or increasing pay rates to minimize the gap between lower paying jobs which are hard to fill and the higher paying jobs; adding equipment, personnel, and infrastructure at pace to keep even with, or ahead of, growth.

2. As Gallatin continues to grow, what do you feel are the pros & cons to constructing a new City Hall?

Response: Pros: more flexible space to change office configurations as departments expand and contract; healthier building; safe building; ADA compliance; space for future growth; improved technology; improved HVAC, electrical, plumbing, etc.. Cons: Paying for it; public backlash. Loss of history of building.

3. What is your vision for a new City Hall?

Response: Whether new or existing, a welcoming, efficient, safe, flexible space, not overdone with amenities, decorations, or interior design. Professional, but warm. Easy to maintain both for cleaning and repair of infrastructure. Good lighting. Flexible large public area (chambers).

4. In your view, what are the greatest needs that a new City Hall should address?

Response: Efficient service to citizens and other customers; creating work spaces that appeal to millennials, Gen Z, and future generations as they enter the workforce; an ADA compliant, healthy, safe building; flexibility for future needs/changes in delivery of services.

5. Are there any impending changes to your organizational structure, or are there alterations that are being considered that should be allowed for in a space needs study?

A. ☒ Yes or ☐ No

B. If so, please describe:

Response: The unknown of the configuration of the work currently done by the City Recorder/City Judge in two years when the jobs are no longer elected. We must accommodate a 1099 agreement with a local attorney to preside over city court - and determine where the rest of the functions of the office will be distributed. It is anticipated that the recorder will require some support staff (2-3) and judge position will have a full time paralegal - all could be housed with legal. The tax personnel would role into Finance - approximately 4 staff.

6. Are there any current departments within City Hall that could be relocated to another City facility?

A. ☒ Yes or ☐ No

B. If so, please describe:

Response: Potentially Building Codes and Planning - public might be better served if they are part of the Public Works compound where Engineering is located.

7. Are there any present community functions or programs that you anticipate will not be provided at the new facility?

A. ☒ Yes or ☐ No

Response: An industrial kitchen and rental space for private parties and other functions. Multiple office kitchen spaces. Drive through will likely be obsolete in coming years.

B. If so, please describe:

Response: Eliminate the industrial kitchen and dining room - no longer allow the public to rent spaces in City Hall for parties and other similar events. Create a large break area for all departments and eliminate multiple kitchen facilities.

8. Are there any current departments located outside City Hall that you think should be relocated to City Hall to improve operations?

A. ☐ Yes or ☒ No

B. If so, please describe:

Response:

9. Are there any potential regional or non-city functions that will require space in City Hall, with which your office is involved?

A. ☐ Yes or ☒ No

B. If so, please describe and include any spatial implications:

Response: What regional or non-city functions do you encounter in other city halls besides the local chamber, perhaps, or non-profit functions related to city services?

10. Are there forces in addition to pure population growth that you feel may impact the need for change to your operations over the life of the new facility?

A. ☒ Yes or ☐ No

B. If so, please describe:

Response: Changes in technology and how we use it to serve citizens, customers, and employees.

11. What service functions could be accommodated by technological means in the future? (i.e. bill pay, permit review?) Or is it important to you that all citizens/visitors have the option to conduct business in person?

Response: For today, It is important that citizens/customers be able to conduct business in person with strong encouragement to do business on-line. We have an older population that still prefers in-person business. Anticipated elimination of that need in your expert estimation would be?

12. How many City-owned vehicles should be contemplated for this study? Also include any specialty vehicles require special size space, charging needs, etc.:

Response: 12

13. How many visitor vehicles should we contemplate for the City Hall beyond those accommodated for any possible public meeting spaces provided for in the Needs Assessment?

Response: Beyond employee parking for the daily need the maximum visitors in City Hall would likely be no more than 20. Council attendance would offset employee parking as it meets at night and could utilize parking that employees use during the day.

14. Are there any service delivery changes that should be reinforced by a new City Hall?

Response: Whatever best-practice changes there are to encourage more on-line use of services.

15. Are there any built-in features, amenities, furnishing or elements in your existing facility that should be relocated or copied in a new facility? (An example would be a drive-up window.)

Response: Should we maintain a drive-thru window? The mayor does not think we should but defers to consultant expertise.

16. Do you think that hybrid work with staggered work schedules is appropriate for some or all departments within City Hall? Why or why not?

Response: For some now, potentially more in the long-range future. Technology allows for it and incoming workforce cultures expect some level of hybrid/flexible work schedules. Some services must be done during daylight hours - Building Codes and Planning inspections for example (if they stay in City Hall.)

17. If hybrid work is appropriate for a department, would shared work spaces be an option based on the staggered schedule approach? (i.e. unassigned shared workstations and offices).

Response: Yes; however, having been through a pandemic, how do you assure they work spaces remain healthy for each user?

18. Do you have an approach to workspace assignments i.e. who is assigned a workstation and who is assigned a private office?

A. ☒ Yes or ☐ No

- B. If so, is the decision on who is assigned a private office based on position / rank or on nature of work, i.e. confidentiality?

Response: Mostly likely, department heads would need private offices. Some jobs may need privacy because of what they do; however, availability of shared private spaces may help eliminate a need for some who currently have private offices to use less space.

- C. Would you be open to changing the work culture to a more open office environment with less private offices or would you continue the same approach to workspace assignments in a new City Hall?

Response: We are willing to explore it. We anticipate that some employees and department heads will be reluctant to embrace change.

19. Are the Current Council Chambers sufficient for City Hall in the future? Are they too big? Too small? Flexible enough to accommodate future events / meetings / City functions?

Response: Council Chambers, which doubles as the city's courtroom, is too small for the number of citizens attending meetings and court. A larger space should be flexible for future events/meetings/city functions - including dividing the room into smaller spaces at times. The existing space could potentially be used more efficiently or extended into the lobby area.

- A. Should the Council Chambers have an Executive Sessions area? (A meeting space in the secure zone of City Hall separate from the public Chamber meeting area?)

Response: It should have an executive session space if this space is not incorporated into the City Attorney's space - or it could be a nearby small conference room.

- B. Do the Council Members need an area to review Meeting Agendas, check mail &/or store their personal belongings while at City Hall for meetings? If so, please describe what type of work area, lockers, personal space would be appropriate?

Response: No - not the way City Council functions today. We do not anticipate a change to the City's Charter that would create a different structure unless it is a City Manager form of government.

20. Do you see any potential community support functions being housed in City Hall (incubator center, visitor information center, community meeting rooms other than the Council Chamber/Board Room?)

Response: No

July 24, 2024

Department: Legal department

Gallatin City Hall - Space Needs Assessment

S8D Project No. 2407.00

Departmental Questionnaire

The City is assessing the space needed for staff to grow and be able to operate efficiently and successfully over the next several years, and would like your input. While completing the Questionnaire below, please think about what work best for your department rather than how to adapt the space you may be working in now. A new City Hall is one consideration in planning for the future. As your staff grows, technology changes, and your interaction with other departments and members of the public evolves, we want to plan for space that will help you deliver City Services in a high-quality manner that Gallatin residents have come to appreciate.

FTE's (Full Time Equivalents):

Please provide a headcount of current staff in your department and an estimated projected headcount for the future ten-year milestones:

- **2025:** 4
- **2035:** 5
- **2045:** 6

Number of Private Offices and Workstations:

Please provide a list of current employees in your department and the workspace type assigned to them (Office or Workstation). Please provide the same information for projected future staff for the future ten-year milestones:

2025:

Name	Position	Office or WS
Susan High-McAuley	City Attorney	Office with large conference area for confidential meetings
Leticia Alexander	Assistant City Attorney	Office
Amy Martin	Paralegal/ Legal Assistant	Office/reception area
Natalie Logue	Risk Manager	Office

2035:

Name	Position	Office or WS
Future	City Attorney	Office with large conference area for confidential meetings
Future	Assistant City Attorney	Office
Future	Risk Manager	Office
Future	Paralegal/Legal Assistant	Office/reception area
Hit Return to add more names if required	Risk Mangement Coordinator/Safety Officer	office

2045:

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Inter-department staff meetings	Once a week at least	At least 1/week	Day	4	In person
Meetings with Mayor, departments heads and other staff re: legal issues	varies but many	Almost daily	Day	2-5	In person
Meetings with opposing counsel, their clients and City staff	Varies	At least twice/month	Day	4-6	In person
Meetings to prepare City staff for litigation/depositions	Varies	At least twice/month	Day	4-5	In person
Meetings with employees re: insurance claims	Varies	Almost daily	Day	2-3	In person
Meetings with citizens re: insurance claims, potential litigation, legal issues	Varies	Several times per week	Day	3-4	In person
Executive Sessions with Council	As needed to discuss confidential litigation matters	As needed	Evening	9	In person
Safety Committee mtgs - meets in Council Chambers - All other meetings occur in the City Attorney's office	12	Once a month	Day	15	In person

for confidentiality purposes					
Depositions	As needed	Approx 6/year	Day	6-8	In person

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: 3-15, depending on the day

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: Mainly staff, but we do get public visitors

3. What is the typical length of visits?

Response: 5 minutes to several hours, depending on the purpose of the visit

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Yes, for the most part we have appropriate meeting space in the City Attorney's office. If necessary, we can use Council Chambers or the Mayor's conference room. However, due to the confidential nature of most meetings, it is best to have meetings in the City Attorney's office, especially when employees need to make confidential reports.

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: Yes, we operate as a law office. It is necessary to have a reception area to greet and hold people for meetings, especially when meetings are scheduled adjacent to other meetings - which is often.

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Our entire area must be secured and dedicated to our department only due to the highly confidential nature of the work.

7. Is there a waiting or queuing area needed for your department?

Response: Yes, please see response to 5 above.

8. Could this waiting area be shared with another department?

Response: No

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: We don't have a service desk. We have a small reception area. This is often the front line of people making requests to meet with the City Attorney. We are in a secured office with the door closed at all times so people can feel confident entering and speaking without others overhearing.

10. How long do these various interactions usually last, and how often do they occur?

Response: Very dependent on the circumstance

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: No. not typically

12. How comfortable is the level of security and safety provided by the service counter?

Response: We are located in a locked and key card access only hallway and locked and key card access only door to the office. We have had interactions with the public upset over litigation and other City matters once the legal office becomes involved that required the double security.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response:

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response:

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: The waiting area is small in our office, so only 2-3 people can wait at a time. However, we can have people wait in the hallway or 2nd floor lobby when necessary.

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: We meet with departments, Mayor, City Council regarding legal and administrative issues. We provide oral and written legal opinions to the Mayor, City Council and departments. We meet with employees and the public regarding insurance claims, and we file and monitor all claims from inception to closure. We review all contracts, draft ordinances and resolutions. We work with the departments and the boards stemming from other departments and give advice. We attend court, depositions, mediations and other legal processes. We manage all litigation. We work with departments and employees to reduce the City's risk and potential liability. We research legal issues affecting the City. We draft deeds and record legal instruments on behalf of the City. We provide legal

updates and trainings to City Council and City staff. We maintain all City property and liability insurance policies. We are responsible for the safety policies and functions of the City. We assist departments in safety trainings.

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: We have many and various processes that initiate differently. Our workday is determined by the other departments and crisis might occur on a given day. Those processes can be initiated electronically or in person. We have LOTS of collaboration both within our department and with other departments, City officials and the public. The City Attorney and Risk Manager spend a lot of their days in in person meetings. However, we do have chunks of time that are quiet/research related portions of the day. We have both lots of collaboration and administrative duties. Because we host meetings throughout the day, the paralegal spend the necessary time greeting visitors and screening calls.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: Our office is a support office. We interact with all departments to provide legal support and advice and to assist with insurance claims and all other risk management related issues.

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: Our office is a support office. We interact with all departments to provide legal support and advice and to assist with insurance claims and all other risk management related issues.

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: Everyone in our department has an office. The setup could be better, but we make it work. Most of our work is highly confidential, which necessitates the need for closed door, private meetings. Many of the employees who visit do not want others to know they are even in our office.

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: The City Attorney's office is larger due to the number of people in the office that attend private, confidential meetings. The Assistant City Attorney and Risk Manager also have people in their offices almost daily for smaller confidential meetings. The paralegal's office/reception area needs to be large enough to greet guests and have a waiting area.

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: N/A

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response:

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: No. We have many in person meetings and need to collaborate in person often.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: No

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: No. We have our own printer due to the private and confidential nature of our work.

10. What would you keep the same about your current space?

Response: Same size offices

11. What would you like to change about your current space?

Response: Better flow and a designated area for the copier. To get to the City Attorney's office, you must walk through the Risk Manager's office or the paralegal's office. The copier is in the Risk Manager's office, which is distracting for her when she is in a meeting or on telephone conference and copies must be made.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: See above.

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: The size works fairly well.

14. Give examples of concerns:

Response: The printer is in the Risk Manager's office. The IT equipment for much of the second floor is in the Asst City Attorney's office. Her work gets disrupted when issues arise and work must be done on the equipment. Better flow of traffic would be good.

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: Yes, we are self contained and need to remain that way due to the nature of the confidential work we perform.

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: No

Storage Needs:

1. What are the special filing needs for your department?

Response: We have 2 large file cabinets in the office, and a large storage cabinet in the hallway. We also have a closet in the office to store items.

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: We scan most documents, but we must keep some hard copy documents.

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Yes, depending on the document type.

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: We need access to some of the documents quite often, so they need to be stored in our office space.

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: Same as we currently have.

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: Yes, we must print in our offices, which is why we have our own copier/scanner.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: Copier, server equipment

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: We need the copier/scanner to remain in our office and for our use only.

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room:
- Workbench and Storage Area:

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response:

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response:

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response:

3. What spaces are missing in your current City Hall?

Response:

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: All of the listed amenities above would be beneficial.

Gallatin City Hall - Space Needs Assessment

S8D Project No. 2407.00

Departmental Questionnaire

The City is assessing the space needed for staff to grow and be able to operate efficiently and successfully over the next several years, and would like your input. While completing the Questionnaire below, please think about what work best for your department rather than how to adapt the space you may be working in now. A new City Hall is one consideration in planning for the future. As your staff grows, technology changes, and your interaction with other departments and members of the public evolves, we want to plan for space that will help you deliver City Services in a high-quality manner that Gallatin residents have come to appreciate.

FTE's (Full Time Equivalents):

Please provide a headcount of current staff in your department and an estimated projected headcount for the future ten-year milestones:

- **2025:** 7
- **2035:** 12
- **2045:** 15

Number of Private Offices and Workstations:

Please provide a list of current employees in your department and the workspace type assigned to them (Office or Workstation). Please provide the same information for projected future staff for the future ten-year milestones:

2025:

Name	Position	Office or WS
Rachel Nichols	Finance Director	office
Joshua Shoemaker	Deputy Finance Director	office
Vickie Willoughby	Accountant II	office
JR Smith	Purchasing Agent	office
Annette Bailey	Accountant II	office
Kelly Willoughby	Accountant I	office
Scott Beaman	Grant Coordinator	office

2035:

Name	Position	Office or WS
Future	Internal Auditor	office
Future	Project Manager	office
Future	Inventory Clerk	work station
Future	A/P Clerk	work station
Future	Payroll clerk	office

2045:

Name	Position	Office or WS
Future	A/P Clerk	workstation
Future	Purchasing Manager	office
Future	Accountant I	office
Future		
Hit Return to add more names if required		

Parking Needs:

What are the current parking needs of your department?

City Vehicles:

- 2025: 0
- 2035: 0
- 2045: 0

Personal Vehicles:

- 2025: 7
- 2035: 12
- 2045: 15

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Staff meeting	1	week	day	7	in person
meeting w/other depts	5	week	day	2	in person
meeting w/consultants	1	month	day	2	in person
meeting w/banks	1	month	day	4	in person
Qtrly meetings	1	quarter	day	40	in person
Auditors	15	year	day	6	in person
meeting w/vendors	2	week	day	2	in person
bid openings	2	month	day	4	in person

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: 16

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: City staff, in city hall and from other facilities

3. What is the typical length of visits?

Response: 30 minutes

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Other staff are usually present to discuss a specific project or problem with a specific finance employee. Current office sizes are adequate for this need. My office can hold 4 comfortably, 7 or 8 uncomfortably but for brief periods. Anything larger/longer requires us to find another space to use.

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: not required

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Could be shared if there was one

7. Is there a waiting or queuing area needed for your department?

Response: Not usually, but occasionally (bid openings, early arrivals to a meeting)

8. Could this waiting area be shared with another department?

Response: yes

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: n/a

10. How long do these various interactions usually last, and how often do they occur?

Response: n/a

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: n/a

12. How comfortable is the level of security and safety provided by the service counter?

Response: Depends on who is staffing the counter.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: Have an (obviously/openly/very apparent) armed officer at the counter, use metal detectors at the front doors, limit access beyond the counter (buzzed back, escorted...)

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: n/a

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: n/a

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Multiple functions: payroll, accounts payable, purchasing and POs, grants, audits, budgets and amendments, accounts receivable, until an internal auditor is hired - some of those functions, daily bank deposits, bank reconciliations,

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: Most processes are initiated via paperwork from other offices/sources. At the moment, every current function needs quiet time and separate office spaces. Work stations will not work well at this time, and for many functions of the office, will never work well.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: HR - constant back and forth on payroll issues, new hires, terminations, changes, etc... Recorder - daily interaction for deposits. Attorney - weekly conversations on various projects. All departments daily - POs, A/P

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: all - POs, A/Ps, payroll

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: nature of their work, needing to concentrate, privacy for certain functions, and position

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: a 10x10 would serve well for all functions, all have desks, computers, monitors, maybe scanners, filing cabinets though the number varies, and 1-2 chairs for visitors.

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: none yet - anticipate may be able to use in the future for clerical/data entry type functions

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: anticipate a desk, computer, scanner

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: no - multiple reasons. Either work loads will have to be shifted back to departments for them to do work that we currently do, or multiple pieces of equipment will have to be transported back and forth (computer, scanner, printer)

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: no

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: Potentially, again, not something that works with current staff but with the addition of some clerical data entry type positions, it has potential

10. What would you keep the same about your current space?

Response: Not much other than office sizes

11. What would you like to change about your current space?

Response: Total design, a U-shaped design with offices along the outside walls and shared space in the center would be great. Offices would line outside (and have the windows), center would contain work room with filing cabinets, printers, storage. Additionally a small meeting room could be in the center to be used by the entire department as needed.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: Not that I'm aware of

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: Total space is good for current staffing level. Space is not chopped up well. We do the best we can with what we have, but you have to go through someone's office to get to someone else, one office shares the kitchen space which gets noisy and distracting, ...

14. Give examples of concerns:

Response: ?

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: yes?

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: no

Storage Needs:

I. What are the special filing needs for your department?

Response: Nothing special, normal filing cabinets and shelving

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: For most things, we are electronic. We keep the paper copy only until the auditors are finished with their annual review. The one remaining item that is only paper has multiple attachments in various sizes that just makes it a bit unwieldy to scan. Records Retention for that is 8 years and there are multiple bankers' boxes for 1 year.

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Yes, everything for some set length, lengths vary, most can be electronic

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: Can be elsewhere or offsite

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: In total, approx 15 filing cabinets and 30-foot of 6-8 foot tall shelving?

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: Yes and yes

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: 2 printers and 1 check-folder

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: As long as shared copiers are still available, no

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room:
- Workbench and Storage Area:

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response:

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response:

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: no - people using the Mail room don't even pick up after themselves. If they use a shared kitchen, I doubt they will clean up after themselves there either.

3. What spaces are missing in your current City Hall?

Response: ?

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: access to daylight, comfy break room,

Parking Needs:

What are the current parking needs of your department?

City Vehicles:

- 2025: 0
- 2035: 1
- 2045: 1

Personal Vehicles:

- 2025: 6
- 2035: 8
- 2045: 10

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Staff	1	Week	Day	6	Hybrid
Staff (Orientation)	1	Week	Day	5	In Person
Staff (Retirement)	2	Month	Day	2	In Person

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: 10-20

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: Employees from other City Facilities

3. What is the typical length of visits?

Response: 10 minutes, up to 30 minutes average

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Benefits changes, Orientations, Personal Medical Information/Leave requests, employee complaints, applications, payroll questions.

No, we don't currently have appropriate confidential meeting spaces.

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: Service counter, reception area

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Department-specific

7. Is there a waiting or queuing area needed for your department?

Response: Yes

8. Could this waiting area be shared with another department?

Response: Yes

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: Currently all, the service counter is the only space we currently have.

10. How long do these various interactions usually last, and how often do they occur?

Response: 5-15 minutes on average, 5-10 times per day.

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: Yes, paperwork is often involved. Distribution generally within department.

12. How comfortable is the level of security and safety provided by the service counter?

Response: general feels safe because of panic buttons, but otherwise, it's a freeforall.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: Office could be enclosed with glass and require badging to get through interior doors

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen

monitor)?

Response: Computer, printer, copier

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: Definitely need confidential meeting areas for people to discuss personal information/benefits/life changes.

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Orientations, employee/manager meetings, Systems trainings, Report running, Lots of confidential conversations/calls.

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: Currently the workspace is set up with 3 work stations in the main area. Visitors are greeted by one of the people who sit in that section. Visitors currently conduct most business at the counter, but there needs to be confidential meeting space to allow employees to divulge personal information. Collaboration currently involves the entire group sitting in that shared work space having a meeting while remaining aware of people coming into the office.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: We interact with all departments on a regular basis. Most often, it is Finance, IT, and the Mayor's office.

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: We interact with employees from all departments on a regular basis, as well as the general public.

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: Currently it's based on position and lack of space. In the future, it would be optimal to have it based on confidentiality concerns.

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: Desk with locking drawers & additional working space, chairs for meeting with individuals, and

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: All of our tasks are employee/people focused and just depends on the day. There tends to be some collaborative effort. We currently have 1 full time and 2 part time employees at work stations. And, they'd need locking file storage in addition to a computer and telephone. Possibly looking at desktop scanners as we move to electronic document housing.

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: Work station size could be consistent across the department.

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: I believe it could be, but whether that is realistic, I'm not sure. Also, we are currently paper-heavy, so until we can make a more electronic transition, shared work stations would NOT be a feasible option, as each person needs to be able to track their own documents.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: We are generally all in the office 7:30 - 4:30 M-F, with PTers alternating days off. All 6 are in the office at one time on Tuesdays and Wednesdays right now.

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: No, we deal with mostly confidential information.

10. What would you keep the same about your current space?

Response: Very little. Our work space is choppy, cramped, and not conducive to workflows. My office is literally completely separate from the rest of the HR office.

11. What would you like to change about your current space?

Response: We need additional confidential meeting space, whether individual offices, or a meeting room. Ideally, we would have application kiosks/computers available for the public to apply for jobs or employees to access their electronic employee self-service features. We are the only department that doesn't have a kitchen/break space. We did acquire a full size refrigerator last year so more than one person could bring their lunch on a given day.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: We are actively working on paper reduction with electronic workflows and processes.

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: Too small - far too small.

14. Give examples of concerns:

Response: The department is split across the hall. We have an abundance of paper files that take up more room than they should. There is no confidential space for employees to speak about personal issues without a possible audience.

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: For the most part, yes.

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: No.

Storage Needs:

1. What are the special filing needs for your department?

Response: We house all employee files.

A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: Yes, we are moving toward that, but it will be some time coming.

B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Yes, there are lots of retention requirements for employee files and other personnel-related files.

C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: Active files work best in the workspace, unless we are electronic.

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: A smaller storage room should suffice, but we need more than the small closet we have right now.

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: currently, yes.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: One large copier/scanner in main HR room. There is a server box in the HR Director office based on previous use, so it's not necessary to allow for that.

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: Would like to have mounted TVs for computer work, presentations, employee meetings.

3. For the IT Department, please describe the general size and requirements of the following:
 - Server Room:
 - Workbench and Storage Area:
4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response:

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: no

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: I think it's possible a shared break space would work, but more ideal with be a common break area on each floor. I fill my drinks from the fridge several times a day, so having to travel several floors to do so would be a time-waste.

3. What spaces are missing in your current City Hall?

Response: Meeting space. Instructional areas (computer lab or large classroom-type space),

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: Definitely access to daylight, mother rooms (legal compliance), I know several employees have requested fitness space. I think wellness rooms, sensory rooms specifically, could be helpful for a lot of people. A place to refocus or decompress for a few minutes away from the workspace. Also, outdoor, covered, non-smoking seating areas have been requested. A lunch café would be amazing and convenient.

Gallatin City Hall - Space Needs Assessment

S8D Project No. 2407.00

Departmental Questionnaire

The City is assessing the space needed for staff to grow and be able to operate efficiently and successfully over the next several years, and would like your input. While completing the Questionnaire below, please think about what work best for your department rather than how to adapt the space you may be working in now. A new City Hall is one consideration in planning for the future. As your staff grows, technology changes, and your interaction with other departments and members of the public evolves, we want to plan for space that will help you deliver City Services in a high-quality manner that Gallatin residents have come to appreciate.

FTE's (Full Time Equivalents):

Please provide a headcount of current staff in your department and an estimated projected headcount for the future ten-year milestones:

- **2025:** 18 Full-time, 1 Part-time
- **2035:** 20 Full-time
- **2045:** 25 Full-time

Number of Private Offices and Workstations:

Please provide a list of current employees in your department and the workspace type assigned to them (Office or Workstation). Please provide the same information for projected future staff for the future ten-year milestones:

2025:

Name	Position	Office or WS
Chuck Stuart	Director	Office
Ben Harris	Deputy	Office
Brandon Howell	Assistant Director	1/2 Office
Nathan Woodard	Data Engineer	1/2 Office / WS
Cheyenne McGlone	Admin Associate	WS
Katie Martin	Permit Associate	WS
Jim Wethington	Permit Associate	WS

Tracey Tillman	Permit Associate II	WS
Connor McCormick	Permit Associate	WS
8 Inspectors		WS

2035:

Name	Position	Office or WS
Future		
Future		
Future		
Future		
Hit Return to add more names if required		

2045:

Name	Position	Office or WS
Future		
Future		
Future		
Future		
Hit Return to add more names if required		

Parking Needs:

What are the current parking needs of your department?

City Vehicles:

- 2025: 12
- 2035: 10
- 2045: 10

Personal Vehicles:

- 2025: 11
- 2035: 10
- 2045: 10

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Staff	2	Month	Day	18	In Person
Public	1	Week	Day	5	In Person
Public	2	Bi-weekly	Day	5	Virtual

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: 10-20

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: 10-15 Public, 1-5 City staff

3. What is the typical length of visits?

Response: 15 minutes

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: 10-15 Permit purchasing, 1-5 discussing projects

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: Yes

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Yes

7. Is there a waiting or queuing area needed for your department?

Response: Yes

8. Could this waiting area be shared with another department?

Response: Yes

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: Permit purchases

10. How long do these various interactions usually last, and how often do they occur?

Response: 10-20 minutes for permits, 45 minutes-1 hour for projects

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: Yes, making copies. Most work is electronically.

12. How comfortable is the level of security and safety provided by the service counter?

Response: Could be a more secure area.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: Counter area should be behind glass like the Records Office.

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: Permitting- computers and cashiers, Zoom meetings in one office

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: Continue to move customers to the self-service portal.

Workplace and Function:

- I. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Permitting- process new permits daily, Inspectors- In field inspecting and completing reports

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: Uploading or receiving plans/permits which are then reviewed and processed. After approval, permits are issued and then inspections are performed. After approved, CO is issued.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: Planning and Attorneys- New development and zooming meetings

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: Engineering, Fire, Vehicle maintenance

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: Yes

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: Desk, TV for zoom, Book shelves, White boards 10' x 20'

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: Yes

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: Inspectors- In field 75% of the day, workstation is used for reports and studying. Permit associates- In office 100% of the day, workstation is used for permitting and processing plans and permits.

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: That is our current situation.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: Yes, 1 hr in the morning and 1.5 hour in the afternoon.

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: Current situation

10. What would you keep the same about your current space?

Response: Workstation for inspectors

11. What would you like to change about your current space?

Response: Improved space and safer area for cashier and permitting.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: Continue to move customers to the self-service portal.

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: Too small for current number of employees but will be just right in the future.

14. Give examples of concerns:

Response:

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: Yes

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: No

Storage Needs:

- I. What are the special filing needs for your department?

Response: Most work is done electronically.

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: Most work is currently electronic.

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Currently electronic-Laserfiche

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: On laserfiche

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response:

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: Yes, needs to be retained for 5 years.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: Second floor printer, Map plotter

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: I-plan Tables for plan review

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room: N/A
- Workbench and Storage Area: N/A

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response: N/A

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response: N/A

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: No

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: Already have one

3. What spaces are missing in your current City Hall?

Response: N/A

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: Fitness Room, Daylight for office workers, Outdoor barbecues

Parking Needs:

What are the current parking needs of your department?

City Vehicles:

- 2025: 3
- 2035: 5

- 2045: 7

Personal Vehicles:

- 2025: 11
- 2035: 20
- 2045: 25

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Planning Commision	2	Month	Evening	50	In Person
BZA	1	Month	Evening	15	In Person
Historic District Comm.	1	Month	Evening	10	In Person
Staff Meetings	4-5	Month	Day	11	In Person
Developer Meetings	8	Month	Day	4	In Person
Pre-Application Mtgs	16	Month	Day	18-20	Virtual
Project Assignment Mtgs	4	Month	Day	6	In Person

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: 30

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: Public

3. What is the typical length of visits?

Response: 15-30 min.

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Not Enough

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: Yes

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Dedicated Reception Area for our Department

7. Is there a waiting or queuing area needed for your department?

Response: Yes - needed

8. Could this waiting area be shared with another department?

Response: Possibly

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: People applying for Business Licenses or Permits, Zoning Questions, Paying for Permits, Dropping off Mylar Plans, People who have been mis-directed to Planning by other departments, Citizens with questions about new developments or public notice signs they have seen

10. How long do these various interactions usually last, and how often do they occur?

Response: 15-30 minutes and about 15 times a day.

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: Yes to all of the above. Sometimes electronically.

12. How comfortable is the level of security and safety provided by the service counter?

Response: Zero safeguards except a plexiglass stand on top of the counter to fight COVID.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: Need a full tempered glass window with a scan machine for the door to the back. All employees need to scan before entering, Safety exit doors,

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: Computers and iPads

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: Smart Pads, Large Screen TV's to provide development updates to citizens, Computer Stations for online submittals, Charging Stations for Electric Vehicles, Better wayfinding signage in the building, Larger and Faster Elevator, Reception Area Seating, Better and Multiple Conference Room Facilities,

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Reviewing Plans, Meeting with Developers, Helping Citizens, Reviewing Projects, Performing Inspections.

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: Projects are typically submitted online on the CSS Portal, however, a lot of interaction happens prior to that, via customer drop-ins, in-person or virtual meetings, pre-application meetings, phone calls, etc.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: IT when we have technological problems, HR when we are processing employee paperwork, Finance when we are dealing with purchasing or budgetary issues, Codes when we are dealing with building permits or other fire/safety issues, City Attorney when we don't know the rules, EDA when we are working with a business venture, Records office when we are doing records requests, Mayor's office when we are working on Council Packets, and or public information needs through Jeff.

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: Engineering - reviewing subdivision regulations, site surety inspections, stormwater issues, consultant selection process,

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: Partially hierarchy, partially nature of the work, and partially whatever was available when they got here.

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: Director's office should be larger to accommodate meetings, with potentially a small conference table. All other offices need to be able to have a few chairs for small meetings with two or three citizens or developers. Need ample desk space to place plans on the table and have room for large monitors to review large plans on the computer. Need potential for standing desks for healthy living opportunities. Need some book shelving on the wall and file cabinet space at a minimum in the desk. Would like to see each office have at least one window at a minimum.

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: Admin staff is generally there all day, with minor exceptions. Code Enforcement staff is generally in-and-out of the office all day. Planners are typically at the office most of the time but do go out on inspections from time to time. Collaboration with others is constant for all positions.

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: Work stations still require same furniture and space needs as offices. Really, they are just work stations because we don't have enough space for offices for all. We may have a need for some of the work stations to be larger, especially for the admin and receptionist staff.

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: We prefer to keep working from home as an option but not part of the normal work week. We prefer to reserve working from home for instances where someone may be sick or otherwise incapacitated or has child care needs, etc.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: No.

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: No. We need a dedicated copy room and work rooms. We use the copier enough that it becomes a hinderance when we are needing to wait on other departments and their copy needs.

10. What would you keep the same about your current space?

Response: Rooms are too big generally if they are offices. Hallways are too wide. Remainder spaces aren't big enough for all the offices/work stations that we need, so we've already had to get creative about work stations and office spaces.

11. What would you like to change about your current space?

Response: Need a true break room where you can sit and eat your lunch. We don't have room for even a small lunch table. We also need more conference rooms. Maybe a smaller break room that could be a place where a short power nap could occur, and we would like all the planners work spaces/offices to be together instead of being split up into different areas in our corner.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: We are a well-oiled machine. We will continue to evaluate that.

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: Too small.

14. Give examples of concerns:

Response: See answers above. Plus, we don't have any room to grow. We anticipate being more than double our current size by 2045. There will not be enough room for that amount of growth. We barely have room enough for maybe one more person with our current layout.

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: Yes. Enough.

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: Yes. Want to provide work spaces that are competitive and desirable to retain good talented employees. It's very difficult to compete with private companies in particular. Even Hendersonville has better facilities than us.

Storage Needs:

1. What are the special filing needs for your department?

Response: We've got storage downstairs in loads, we generally are required to keep all documents on file. For this purpose, the City has gone digital for submittals and so plans and large documents can usually be stored digitally and not require a lot of space.

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: Yes, Already there for the most part.

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Yes, Forever.

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: Somewhere else is fine, as long as it is accessible (like a storage room within the building).

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: a few cabinets or a storage room as part of the copy room would suffice.

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: Not much concern for security. We do a fair amount of printing.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: Large scale printer (Plotter) and high capacity copier/printer.

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: Smart Screen

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room: N/A
- Workbench and Storage Area: N/A

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response: N/A

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response: N/A

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: No, but common shower rooms would be a plus. That way, employees can take advantage of the opportunity to work out before work, during lunch or after work, between meetings etc.

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: A café would be nice, but we would like our own break room within our own department.

3. What spaces are missing in your current City Hall?

Response: A day care. A Zen Garden for relaxing. A Couch lounge area. Conference Rooms of varying sizes.

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: Definitely access to daylight, shower spaces, fitness rooms, wellness rooms, mother rooms, conference rooms, lounge spaces, roof garden for enjoying the great Gallatin weather.

Gallatin City Hall - Space Needs Assessment

S8D Project No. 2407.00

Departmental Questionnaire

The City is assessing the space needed for staff to grow and be able to operate efficiently and successfully over the next several years, and would like your input. While completing the Questionnaire below, please think about what work best for your department rather than how to adapt the space you may be working in now. A new City Hall is one consideration in planning for the future. As your staff grows, technology changes, and your interaction with other departments and members of the public evolves, we want to plan for space that will help you deliver City Services in a high-quality manner that Gallatin residents have come to appreciate.

FTE's (Full Time Equivalents):

Please provide a headcount of current staff in your department and an estimated projected headcount for the future ten-year milestones:

- **2025:** 3
- **2035:** 4
- **2045:** 4

Number of Private Offices and Workstations:

Please provide a list of current employees in your department and the workspace type assigned to them (Office or Workstation). Please provide the same information for projected future staff for the future ten-year milestones:

2025:

Name	Position	Office or WS
Rosemary Bates	Executive Director	☐
Lilibeth Leon	Existing Industries Coordinator	☐
Vacant	Vacant - rewriting job description	☐

2035:

Name	Position	Office or WS
Future	Executive Director	☐
Future	Assistant Director	☐
Future	Existing Industries Mgr	WS
Future	Admin Asst	WS
Hit Return to add more names if required		

2045:

Name	Position	Office or WS
Future	Executive Director	☐
Future	Asst. Director	☐
Future	Existing Industries Mgt	WS
Future	Admin Asst	WS
Hit Return to add more names if required		

Parking Needs:

What are the current parking needs of your department?

City Vehicles:

- 2025: 1
- 2035: 1
- 2045: 1

Personal Vehicles:

- 2025: 3
- 2035: 4
- 2045: 4

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Public	1	month	day	9	in person
Staff	10	month	day	2 or 3	in person

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: can range from a few to several

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: mainly public - but does includes other city employees. Mostly prospects and other clients doing business with EDA, or seeking information and assistance - representatives of prospect companies; those we collaborate with on projects - local, state, national; local and state educators; elected officials at all levels; economic development colleagues from other cities and states.

3. What is the typical length of visits?

Response: 30 minutes to 2 hours

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Our office currently has a conference table and large screen TV in the Executive Director's office. Not ideal, but we work with it. The table seats 10 people max - and that is squishy. Ideally, we need a space with larger conference table and state of the art video/audio. Heads of companies expect that. The meeting room must also be private. We often deal with people under an NDA and they do not want a lot of other people to know they are meeting with us. I am conflicted about whether this can be a shared conf room - if we know in advance, we could

book the room - but if they show up unexpectedly - we need to be able to access a private meeting space with audio/visuals readily accessed - not just our laptop computers.

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: Not necessarily. If there were a shared reception area where someone could let us know we have guests and then either let them back to our office or let us come get them - that would work. There are times when noone is in our office - we are all working away from the office and it is closed.

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: Shared - see above

7. Is there a waiting or queuing area needed for your department?

Response: Sometimes - but not often now. There are times we have several people who come to meet with us and they crowd into an employees office until the executive director's office is ready to receive them. It can get crowded where they have to wait.

8. Could this waiting area be shared with another department?

Response: No - because of privacy requirements, NDAs, and other confidentiality issues expected in our business

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: No counter - don't need one

10. How long do these various interactions usually last, and how often do they occur?

Response: Not applicable

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: Internal to our office, Yes - they require exchanges of information - both electronically and on paper. We are becoming more electronic - but there are times when paper is the best option for confidentiality.

12. How comfortable is the level of security and safety provided by the service counter?

Response: My opinion from witnessing transactions in other departments - not secure or safe at all. Except - the City Recorder's office. They have window counters - but not bullet proof.

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: Overall, current city hall is way to accessible - and not safe.

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: not applicable to my department

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: We would prefer to NOT be in the "gated community" of city hall where our visitors/clients have to call us from the lobby to be let into our hallway. It is not terribly friendly and welcoming.

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Lots of meetings and phone calls; data and information research; online training; customer relations; prep for board meetings; lots of emails; daily chats among all employees in our office.

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: Workflow is initiated by state RFIs, prospect inquiries, customer needs, requests from Mayor and council, other city departments, from those we collaborate with; and other various outside entities. Certain amounts of workflow are determined by the Exec. Dir.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: Planning & Codes - working on prospect zoning and codes inquiries, site plans, getting planning and council approval, troubleshooting the path to construction and opening a new company, helping existing industries with any questions/issues they have with these departments. We also work a lot with Engineering - although they are not in city hall - we either meet with them in our office or meet at theirs on Long Hollow. It would be nice to have an Engineering representative in city hall.

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: Engineering - see above. Public Works - for assistance with city-owned properties under our domain; Public Utilities - mostly for information and scheduling of work related to prospects and existing industries; Electric - quarterly meetings and work on specific projects/prospects. Some of this via email and phone calls, some must be done in person.

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: Confidentiality is a factor mostly for the Executive Director. As long as there is at least one office that is not open to everyone - the Exec Dir, Asst. Dir., Existing Industries Mgr would have a space for confidentiality. Under my time as Exec Dir - I share. I am not territorial with by staff.

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: Need desks, computers (laptops), dual monitors for each employee. We must have storage space for logo items and office supplies - we have lots of logo items. They are in tall, double-door cabinets right now with shelves - we moved them into the hallway outside our office. Need only one file cabinet accessible by all - and that probably won't be needed in 10 years. We would like to have guest sitting space and a coffee prep area - we use a Keurig now. Need the conference room area for meetings and for spreading out plan sheets, etc.

As for size of offices - the space we inherited - the office that is now Lilibeth's is adequate. The space that is the "front" office is too small sometimes if we have several guests waiting. The Exec. Dir. office which is also our conference room would be smaller if we had a separate conference room - but still needs space for the ED to meet with a few folks at a smaller table - or at the hightop area we currently have in my office.

More than anything - these spaces must look professional - on a c-suite level of professional because of the level of prospects we meet with.

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: We don't have work stations currently

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response:

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: Yes to hybrid. However, ideally we would want someone in the office for "regular" business hours for unexpected guests, prospects, etc. I could also see doing four 10-hour days for the Asst. Dir and the third employee. However, hybrid five days a week is probably more ideal.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: No

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: Perhaps - as long as its not far away from our office and we can send things confidentially - and must have color copier/printer, too.

10. What would you keep the same about your current space?

Response: Windows - we have windows and we need more sunlight throughout. There is one office that has not windows.

11. What would you like to change about your current space?

Response: I would knock out the wall between Lilibeth's office and the front room - make those more like work stations. Would want a conference room we could all access instead of it being in the ED's office. I would like to have more openness between the ED office and rest of staff.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: Not sure what you want here

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: Size-wise - maybe just right on total square footage - but the configuration is not good.

14. Give examples of concerns:

Response: Most have been written already - there is probably wasted space in the ED's office.

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: Yes we do

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: No affect - except for that one room with no window!

Storage Needs:

1. What are the special filing needs for your department?

Response: What we have now should suffice - see previous answers

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: Yes - trying to be more electronic with files

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: Yes - for certain grant funded projects.

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: Stored elsewhere

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: In our office? wrote about this in previous questions. Outside our office? Not much. We have a 10' square pop up tent that must be stored other than in our office now.

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: Not right now. We do not print high volume.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: Copier

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: Better A/V - an additional large screen tv or two

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room:
- Workbench and Storage Area:

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response:

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: No

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: Shared coffee/water stand would not work for our department - but a nice shared "lunch room" would be great.

3. What spaces are missing in your current City Hall?

Response: Conference rooms with quality state of the art A/V systems - and modern tables - better chairs - and more space - current ones are not large enough. Also, the community lunch room - we just need one for all employees - not one in each department.

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: Activity room with a couple of game tables, treadmills, etc. A space to do something active and help reset your brain, elevate your energy, get away from your desk, build a sense of team and comraderie. We need a wellness room - and a baby-feeding/breast-pumping room. Would be great to have a private phone conversation room.

7. Is there a waiting or queuing area needed for your department?

Response: no

8. Could this waiting area be shared with another department?

Response: N/A

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: N/A

10. How long do these various interactions usually last, and how often do they occur?

Response: 1HR

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: Occasionally

12. How comfortable is the level of security and safety provided by the service counter?

Response: N/A

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: N/A

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: N/A

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: N/A

Workplace and Function:

- I. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Maintenance of City Facilities

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: City employees/Department heads sending emails/calling in workorders

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: All Departments

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: All Departments

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: We Share an office

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: NO

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: Computer and telephone

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: just a typical size desk and chair

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: Our maintenance personnel goes out to other city facilities to work on equipmet. they are always in and out of the office

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: maintenance staff comes and goes out of the office

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: yes

10. What would you keep the same about your current space?

Response: would like to stay in the basement

11. What would you like to change about your current space?

Response: have separate offices for the maintenance staff

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: the operation on the maintenance office work real well for now

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: to small for the newer employee the will be coming in

14. Give examples of concerns:

Response: to small for the manager and 3 employees working in the same office

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: yes

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: no

Storage Needs:

I. What are the special filing needs for your department?

Response: filing cabinets

A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: we are doing electronic and scanned files now

B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: we keep electronic maintenance files on buildings

C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: we store our paper files in a filing cabinet

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: 10x10 storage closet

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: no concerns on security and we don't print a high volume of documents

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: small printers and computers

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: we would like a work shop and work bench

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room:
- Workbench and Storage Area:

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response: we have a big storage building at the public work complex to keep our equipment in. but just need more storage area in city hall for maintenance dept.

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: no

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: shared break room/café would work. but have one on each floor.

3. What spaces are missing in your current City Hall?

Response:

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: fitness room would be nice

What are the current parking needs of your department?

City Vehicles:

- 2025: 1
- 2035: 2
- 2045: 2

Personal Vehicles:

- 2025: 8
- 2035: 10

- 2045: 12

Frequency of Departmental Meetings:

Please fill out the following chart regarding the frequency, size of meetings specific to your department.

Public Meeting or Staff Meeting?	Number of Meetings	Per Day/Month/Year	Day or Evening	Avg Attendance	In Person, Virtual, or Hybrid?
Staff	4	Month	Day	8	Hybrid

Note: For the Mayor and/ or Recorder Departments, please list the meetings and or Court dates held in the Council Chambers.

Estimated Number of Visitors to the Department per Day:

1. What is the estimated number of visitors to your department per day?

Response: Varies. 5?

2. Are the visitors to your department mainly public visitors from outside City Hall or visits from staff within City Hall or City staff from other City Facilities?

Response: Usually staff within City Hall or staff from other City Facilities.

3. What is the typical length of visits?

Response: 10 minutes to 2 hours

4. Please describe the interaction with visitors to your department. Does your Department (or City Hall) have appropriate meeting spaces for these interactions?

Response: Those IT employees with workstations rather than closed-door offices do not have appropriate meeting space for these interactions. Sometimes they need space where they can collaborate without interruption and distraction.

5. Is a reception area, front desk, service counter, or drive-up window required for your department?

Response: No

6. Do you see this area as a shared reception area or service counter with other departments or a dedicated reception area for your department?

Response: No

7. Is there a waiting or queuing area needed for your department?

Response: No

8. Could this waiting area be shared with another department?

Response: No

9. If your department has a service counter, what types of interactions commonly occur at the service counter?

Response: No service counter.

10. How long do these various interactions usually last, and how often do they occur?

Response: N/A

11. Do these interactions require the exchange, printing, copying, or processing of paperwork? What is the workflow of any papers / permits filed? Do they need to be distributed to others? Can this be done electronically?

Response: N/A

12. How comfortable is the level of security and safety provided by the service counter?

Response: N/A

13. If the service counter is not safe, what suggestions do you have for how it can be improved?

Response: N/A

14. What technology is used by employees during these interactions (e.g., on-line data on a flat-screen monitor)?

Response: N/A

15. How do you think your department could improve its service to visitors? This could be a spatial improvement to the customer service area or making use of new technology.

Response: N/A

Workplace and Function:

1. What typical functions and activities does your department perform daily? Please give a brief description:

Response: Too numerous to list but in general: We make sure the needs of employees are being met so that they can perform their job duties with maximum efficiency. In addition, we ensure that the city's network and computing infrastructure is intact and operating efficiently.

2. Describe the workflow through your department. Where does it initiate and what processes are involved (i.e., greeting visitors, collaboration, quiet time, meetings, etc.)?

Response: This varies but in general: If we get a user request, an IT employee takes ownership of the request from start to finish. Depending on the circumstance, this can be accomplished with or without personal interaction. If we are working on a project, we collaborate together to forge the best path forward, always taking into account what's best for the City employees and taxpayers. If we are working in crisis mode, it's all hands on deck.

3. List the department(s) with which you interact the most within City Hall. Please describe the nature of this interaction:

Response: The IT Department touches all internal departments.

4. List any department(s) that you interact with on a regular basis outside of the City Hall facility. Please describe the nature of this interaction:

Response: The IT Department has regular interaction with all City facilities outside City Hall. Since the Electric and Utilities departments have their own IT staff, we don't support them, but we interact with them on special projects.

5. For those people in your department that are assigned a private office, is the assignment to an office based on the nature of their work, confidentiality concerns, or hierarchy/position?

Response: All three. We have 4 employees that don't have an office with a closable door, and that is sometimes a problem because all of the IT employees regularly need to meet with others without interruptions and ambient noise. That is not possible in the current scenario.

- a. How would you describe a typical office in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical office in your Department?

Response: Offices the size of my current one are sufficient. A closable door is preferred for all IT employees. Desk. Shelf space. A small table is nice for meetings. Typically the meetings are small so a small table is sufficient. We need a space we can share among ourselves where we can stage systems and other peripherals for deployment. This is important for us to have. We also MUST have storage space for equipment and spare parts. And of course, we need a server room.

6. For those people in your department that are assigned a workstation, how would you describe their day-to-day work tasks? Do they collaborate with others? Are they in the office part-time and / or in the field part-time? What do they need at their workstation beyond a computer and a telephone to do their job effectively?

Response: They do collaborate with others. They are in office most of the time but sometimes in the field.

- a. How would you describe a typical workstation in terms of size, work tasks that need to be done, and furniture needed? Is there any reason for more than one size or type of typical workstation in your Department?

Response: IT needs closed door offices rather than workstations.

7. Do you think that a hybrid work model (working part time in the office, part time out of the office) would be an option for your department? Why or why not?

Response: IT is actually currently actively working in a hybrid model , whereby at least 2 people are in the office at any given time to address needs that require face-to-face interaction. This arrangement is working well and we can continue this on a permanent basis without losing productivity. In this case, we can operate in a smaller space. However, IF we at any time are required to return to the office on a permanent basis full-time, we would require a bigger space. And of course, we need a secure server room.

8. Are there members of your departmental staff that spend most of their day away from the office? If so, when do they typically come into the office and for how long?

Response: No, but they could be away from the office for hours on special projects.

9. Would shared workroom/copy areas with other departments work for your department? Why or why not?

Response: I have a copier/printer and we have a shared copier/printer. That works well. We have some but not tons of copying/printing.

10. What would you keep the same about your current space?

Response: It is sufficient space for our current needs.

11. What would you like to change about your current space?

Response: Closed-door offices for all.

12. Are there any operational changes that could be made that could improve the way the department or you function?

Response: We are continuously looking for ways to improve.

13. Is the current space for your department too large, too small, or just right for you to perform your job duties efficiently?

Response: We need all closed-door offices. Other than that, it is sufficient.

14. Give examples of concerns:

Response: As described earlier, IF we continue in a hybrid environment, then we can actually get by with a smaller space than we currently have. Provided however, it has closed-door offices and storage space. in addition, if we get moved to a smaller space, and then are required to come back into the office full-time, a smaller space WILL NOT be sufficient. And of course, we need a secure server room.

15. Does your department have easy access to the places and tools you need to perform your job duties? If not, please provide examples.

Response: Yes

16. In your opinion, does your current work environment affect your ability to attract or retain employees within your department?

Response: No

Storage Needs:

1. What are the special filing needs for your department?

Response: Not much filing need, but storage space for equipment is required.

- A. Are you moving towards electronic / scanned files? Is there any reason you cannot move towards electronic / scanned files?

Response: Yes. No.

- B. Do you need to retain files (hard copy or electronic) for a specified period of time?

Response: No.

- C. Do these files need to be stored in your workspace, or could they be stored somewhere else in the building (or offsite)?

Response: N/A

2. What quantity of storage is needed for office supplies and other Work Room materials?

Response: A large room for equipment.

3. Do you have security concerns about documents that you print or scan? Do you print a high volume of documents?

Response: No. No.

Equipment Needs:

1. List all large-scale equipment currently located within your department. (Copiers, large scale printers, server room, etc.):

Response: Secure server room with multiple racks.

2. Is there any new equipment you would like or need to incorporate into your new workspace?

Response: No

3. For the IT Department, please describe the general size and requirements of the following:

- Server Room: Currently our server room is approximately 15 x 15. Ideally, it would be 20 x 20. We cannot go down in size for a server room.
- Workbench and Storage Area: Currently, our workbench and storage area is about 10 x 10. Ideally 15 x 15 would be better. We cannot go down in size nor give up this type of space under any circumstances. In addition, we have a 4 x 10 closet for office supplies. We would need a space at least this big in totality in any new space.

4. For the Facilities Department, please list any large equipment or storage needs specific to your department.

Response:

5. For the Communications Department, what spaces do you need for the purpose of interviews, recording, storage of equipment, sound booth, and control room for the Council Chambers?

Response:

Support Spaces:

1. Does your department require locker rooms and/or changing and shower rooms?

Response: No

2. If your department has a conveniently located small coffee counter in your department, do you think a shared break room and/or café would work for all the departments in City Hall?

Response: No.

3. What spaces are missing in your current City Hall?

Response: Comfortable collaboration space.

4. In your opinion, what other spaces amenities would most improve the day-to-day experience of the employees in your department (i.e., access to daylight, fitness room, wellness rooms, access to private phone rooms, mother rooms, etc.)

Response: Access to daylight would be a big plus, and a fitness room.
